Just at this time the representative statesmen of the major nations of the world have been discussing the future possibility of world peace, and Mr. Kellogg, from America, has journeyed to Europe with the intention of having signed a pact to outlaw war. These gentlemen who represent, from their own consciences, not the peoples who really want peace, but the people who are contributing to the world's general dissatisfaction, seem to think that they can deceive the thoughtful majority who know that their efforts are only gestures offered without sincerity for diverting public opinion from the underlying source that creates all disturbances in the world.

The Men Who Make War

Mr. Kellogg knows well that men like Harvey Firestone and the directors of the National City Bank of America, and all the great Trusts' directors of his country, along with those of England, France, Germany, and the other progressive countries of Europe are really doing the things, that of exploiting the lands and values of other peoples, which surely contribute to wars and rumors of wars. When these governments and their commercial imperialists extend their influences into other peoples' countries, as they are still doing in India, Africa, and the countries of Central and South America and elsewhere. how in the name of goodness do they think that they can outlaw war to the point of preventing oppressed peoples from freeing themselves from the great terror that possesses them?

War Like Human Passion

War, like human passion, cannot be legislated against, because no one can tell when it will flare up. The thing to do is to legislate against those irritants that contribute to the making of war. Therefore, what the statesmen should do is to really find a way how they can curb their grafters and thieves from interfering with other peoples' property so that there will be no flaring up of passion nor taking up of arms. With all we have read since the Versailles Peace Conference about peace, it seems almost ridiculous for the statesmen to be still inventing ways and means in annual treatics and pacts when in fact the whole thing could he disposed of by just being honest to everybody. Kellogg and his group may think themselves smart and fooling somebody, but in truth they are only fooling themselves. What the world wants is an honest demonstration of human love.

citizen because of his color; let them see to it that it is as possible for a Negro to become President of the United States as it is for a white man. And let those who control the governments of Great Britain, France, Germany and other major nations see to it that their black citizens receive the same rights as the whites. Give every man, regardless of color, the same chances to rise to higher positions within the Empire. Then and only then will we have everlasting peace, such as is being dreamed of by those who really do not intend that we shall have it.

Allow Africa and India to Develop

Let Africa, India and other black countries develop themselves as they see fit, without being encumbered by a system of exploitation and robbery that saps the vitality, not only of the peoples, but the wealth of the countries, and there will be no cause for discord and discontentment among these peoples, looking forward to that which may disturb the peace of the world. Let the white peoples be honest to themselves. Let France and Germany play their cards on the table. But, may we expect this? Surely not. The germ of revenge is too well-seated in the hearts of these opposing nations and peoples for us to expect that there will be no more wars. fair in the great battle of life, because the truth is that every hand is against you because you are black. I haven't to prove this, because you know it. In America because you are black you suffer, and in every other part of the world you are discriminated against and you suffer because you are black. In Europe, and particularly in Africa, you are robbed, brutalized and murdered and everything you possess is taken away from you because you are black, so you can see that it depends upon your own ability that you become free and be respected as a man like other men in the world.

Continue to prepare yourselves and seek every opportunity, but don't you believe for one minute that there is going to be any peace in the world until real human love is demonstrated. Human nature is not made that way, We have had internal conflicts just because man has been unjust to his fellow man. Selfish men, plunderers, men without souls or consciences, will not stop for a minute to think of the peoples they are exploiting. Firestone will not stop for a minute to think about human love and world peace if it is possible for him to make a billion dollars a year out of his rubber scheme by robbing the natives of Liberia. The industrialists and catifulists in Haiti will not stop for a minute to think about human love as long as they can grind another billion dollars out of the poor serfs of Haiti who have sweated and bled and died for the enrichment of white men who control their destiny and their lives.

So also you will find the same attitude in other countries of the world, particularly India, where hundreds of millions of human beings are exploited so as to contribute to the wealth of white men who live in luxury and who invent the idea of outlawing war when they begin to think that there is any possible way for these people to free themselves through such an agency. It is impossible for these men not to know that the thing is ridiculous from the way they are handling it.

We want peace, we want everlasting peace, but we

See the Beam in Your Eye

Let Kellogg and the government he represents make an effort to stop the abuse of the Negro people of America; let them see to it that the Negro gets a fair chance politically, economically and socially and otherwise to develop as an American citizen; let them see to it that no other American citizen lynches, brutalizes or murders another

An Appeal to the Negro

I now appeal to the Negro people of the world not to allow yourselves to be persuaded into the belief that there will be no more wars, for Europe today is preparing for the greatest of wars. The war of 1914-18 will only be comparable to a Sunday School picnic as compared to the war that is to come. It is for the Negro to prepare himself mentally, physically and otherwise to grasp his opportunity during the forthcoming war, because it will surely come just as it came to other oppressed people during the last world conflict. Forget that anyone is playing you must first have universal justice to all mankind. We hope for the time to come when we shall all be able to shake hands and enjoy peace, perfect peace by being equal and by being just.

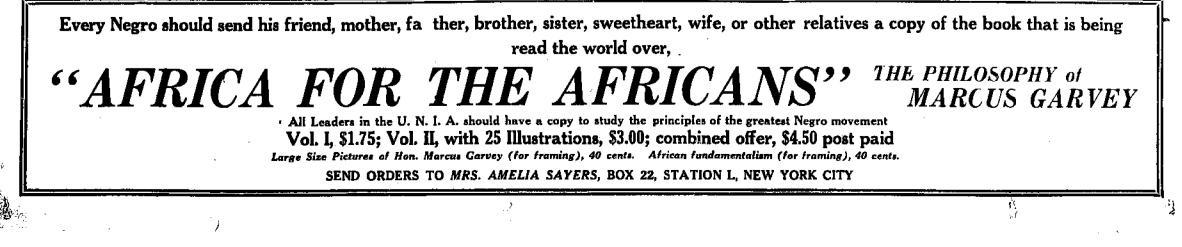

With very best wishes, I have the honor to be
